CINCINNATI (June 1, 2016) – CE Power Engineered Services, LLC (“CE Power”) is pleased to announce a merger with 3C Electrical Company, Inc. (“3C”) of Westborough, Massachusetts. 3C will continue to operate under its name and be led by Jim Cialdea at its Westborough location.

Both 3C and its owner Jim Cialdea have a long-standing track record of serving the needs of industrial, generation, and commercial clients. “We have a solid, 45-year reputation for providing our customers with safety, quality and value,” said Cialdea. “Moving forward that story will not only continue, but gain momentum from the additional resources joining with CE Power provides our customers and employees.”

3C specializes in electrical power engineering, specialty contracting, acceptance and maintenance testing for voltages ranging from 480V through 500kV, and unique services related to NERC compliance. The management and employees of 3C, including NETA-certified technicians, have played an integral role in the company’s growth and will continue to do so going forward. The move also creates exciting new opportunities for existing clients of 3C—including turnkey project management and product solutions. With expanded engineering and technical resources in the Northeast United States, the combination provides significant benefits for existing clients of CE Power as well.

“We believe that both organizations will benefit from this merger as we continue to grow as a premier, independent electrical power services provider,” said Bill McCloy, President & CEO of CE Power.

About CE Power

CE Power is a leading independent provider of outsourced power system engineering, testing, and maintenance services that enhance the functionality and reliability of the electric grid. CE Power provides its services to electric utilities and industrial companies, and to certain commercial clients with critical power applications such as hospitals and data centers. CE Power’s services are delivered with the core business values of honesty and safety for employees, customers, and suppliers. CE Power is committed to being the leading-edge service provider to ensure asset integrity for new and existing electrical power systems. For more information, please visit the company’s website at www.cepower.net.

About 3C Electrical Company, Inc.

Founded in 1971, 3C Electrical Company provides electrical testing, maintenance, engineering, and 24-hour emergency service to the Northeast, including New England, New York, New Jersey and surrounding areas. Known for its expertise with all major power system components, 3C serves the needs of Generation, Industrial, and Commercial facilities.
